## Major Findings

### Executive Summary

### Chapter 1: Introduction to the Everglades Interim Report

Appendix 1: District Responses to Public Comment and Peer Review

### Chapter 2: Hydrologic Needs: The Effects of Altered Hydrology on the Everglades

### Chapter 3: Ecological Needs of the Everglades

Appendix 3: Phosphorus Criterion Development Process

### Chapter 4: Status of Compliance with Water Quality Criteria in the Everglades Protection Area and Tributary Waters

Appendix 4-1: EPA Water Quality Sampling Sites in the Baseline Period and in Recent Years  
Appendix 4-2: Levels of Concern for Water Quality Constituents in the EAA Canals  
Appendix 4-3: Location of Water Quality Sampling Stations in the Everglades Protection Area for the Baseline Period and Recent Water Years  
Appendix 4-4: Water Quality Criteria Excursions for the Everglades Protection Area  
Appendix 4-5: Number of Pesticide Detections and Detection Percentages for Period of Record of the Pesticide Monitoring Program  
Appendix 4-6: Diel Dissolved Oxygen Curves  
Appendix 4-7: Job Control Files for Load Calculation Program  
Appendix 4-8: FORTRAN Code for Load Calculation Program

### Chapter 5: Effectiveness of Best Management Practices

Appendix 5: Numbered Citations Cross-Referenced to Project Summaries

### Chapter 6: Effectiveness and Optimization of Stormwater Treatment Areas for Phosphorus Removal

Appendix 6: Water Quality Monitoring Plan for the Everglades Nutrient Removal Project as required by the FDEP Operating Permit #502232569
