
ACKNOWLEDGMENTS

2012 SFER Team: The South Florida Water Management District gratefully acknowledges the many professionals who have contributed to the *2012 South Florida Environmental Report* (SFER). The overall management of the three-volume SFER main report is centered in the District's Water Resources Division, Water Quality Bureau, under the direction of Stacey Ollis (Volumes I and II) and Stuart VanHorn (Volume III). The Volume I staff works closely with the Florida Department of Environmental Protection's Office of Ecosystem Projects and Division of Environmental Assessment and Restoration to jointly prepare Volume I, Chapters 3A and 3B, and Volume III. Along with the significant contributions of the management teams, this large, multidisciplinary document could not be produced without the guidance of all our agencies' division and bureau managers.

Together, this three-volume main report was developed collaboratively by more than 200 authors and contributors from the District, the Florida Department of Environmental Protection, and other supporting agencies and organizations with expertise in the various reporting topics. The professionalism and dedication of the entire 2012 SFER team that helped prepare this large, complex document are highly recognized. A detailed list of all SFER authors and contributors is presented within each chapter and appendix of the main report, respectively.

Editorial and Production Team: To organize the development of this comprehensive report under tight deadlines, sound management and close teamwork by the SFER production management team is required throughout the entire production process. Under the leadership of the SFER Production Manager, Stacey Ollis, the exceptional cooperation and productivity of the 2012 SFER production team—Kimberly Chuirazzi, Chris King, Trudy Stein and Nathan Yates—of the District's Water Quality Bureau are deeply appreciated.

Peer Review: The depth of knowledge and experience of the expert panel—Drs. JoAnn Burkholder, Peter Dillon, Vladimir Novotny, and Otto Stein—assembled for the draft 2012 SFER – Volume I peer review, as well as the special peer-review panel—Drs. George Christakos, Yoram Rubin, and Jerry Stedinger—for the South Florida Water Depth Assessment Tool (Appendix 1-6) is greatly valued. All of this year's panelists provided insightful and thorough scientific peer review in the major subject areas covered in draft Volume I. The SFER production staff is also recognized for assistance in overseeing this web-based review process.

Other Contributors: The extensive amount of data and other technical information is largely supported by the bureaus of the District's Water Resources Division, particularly under the management and guidance of Terrie Bates, Dee Azeredo, Julianne LaRock, Linda Lindstrom, and Garth Redfield. Many individuals throughout this division have contributed to the essential data collection, monitoring, analyses, validation, and technical assessments for multiple Volume I and III chapters and appendices. They play a key role in the success of this report, and their efforts are respectfully acknowledged. Project managers and chapter authors are also sincerely recognized for producing the 2012 SFER Consolidated Project Report Database, managed by Wanda Caffie-Simpson of the District's Budget Bureau.
