## New eComment for OCTOBER 2020 GOVERNING BOARD MEETING

Diane Perry submitted a new eComment.

Meeting: OCTOBER 2020 GOVERNING BOARD MEETING

Item: 35. General Public Comment

eComment: Colorado, California, New Mexico, Arizona, all need water! Transport the excess water Florida receives every year during hurricane season to these areas! If pipelines can move oil and gas; pipelines can move water! The excess un-remediated nutrient rich waters have use in the West. This can alleviate ecological damages to the Caloosahatchee River, the St. Lucie River, The Gulf of Mexico and Atlantic Ocean and all the homes and business served by these waters. Please think outside the box and find a way to work together!
